

## The efficiency you want, the controls you need

Take advantage of our powerful online tools for more effective management, control and compliance of your land management needs.

## Top 10 reasons to try IPCCONNECT

### 1. Availability to your information when you need it

When you're away from your PC, our custom built apps allow you to access any of the IPCCONNECT office Suite tools you need while in the field on virtually any mobile device.

### 2. Create the software you need

With IPCCONNECT you are no longer limited to off the shelf products. Every land manager has a unique situation that requires specific needs. Our staff can custom build the online tools that suit your needs.

### 3. Track site sheet data in real time

Your organization no longer has to wait for site sheets to be sent via the US Postal Service. Our Tracking program creates a real time system that allows the land manager to see what the applicator is doing in real time. Tracking data can also be customized to meet the needs of any organization.

### 4. See real time maps of the work your staff is doing in the field

Our customized apps allow you to create polygons and download to your web interface while in the field, eliminating the tedious task of reentering all of your data into your desktop at the end of the day.

### 5. Stay compliant with archiving

The ability to retain and discover data across your organization is essential to ensuring internal and regulatory compliance.

### 6. Keep people connected

With IPC's online tools your staff, contractors or volunteers will have easy mobile access to important safety documents, operations planning tools or last minute changes in management decisions.

## 7. Make your management recommendations consistent

With the IPCLogic decision tool your entire staff can have access to a mobile smart tool designed to take all of the variables you consider important into account and create the most efficient and cost effective invasive species control methods for your site.

## 8. Create useable and easily updated management plans

With a custom designed online management plan you can create a management plan that is utilized on a daily basis and updated with the use of your mobile device. Print customized reports, update important tracking information and utilize sections of your plan for marketing, grant writing or administrative purposes without having to dig through your three ring binders.

## 9. Use our online tools to collaborate with other departments, agencies or neighboring land managers.

Our new online tools are excellent for assisting in the management of invasive species but they are also ideal for just about any land management program. Deer management, beaver control, wildlife ecology and conservation programs and native plant programs are just a few examples of management areas that can greatly benefit from development and use of our online tools.

## 10. Manage and control your projects more easily
