

Project Name

Warner Parks (City of Nashville) FOWP

Contact:

Eleanor Willis

Approximate Acreage:

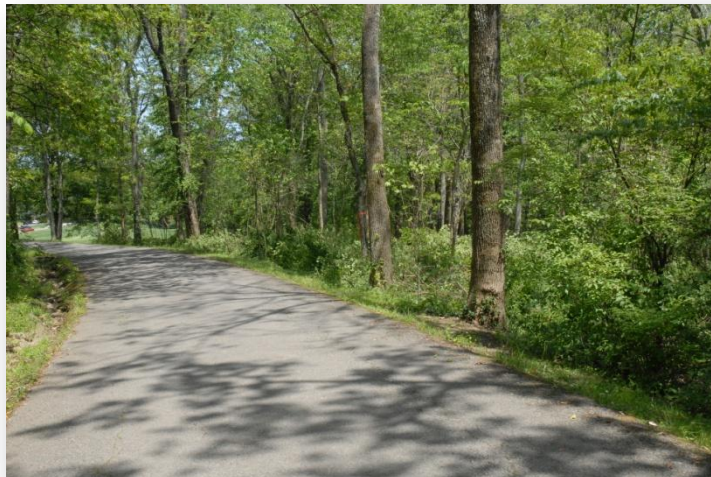

Approximately 2,500 acres property has been treated in numerous sections over 12 year period.

Progress:

IPC has a long history with the Warner Parks. IPC now conducts annual control of invasives and volunteers its time in various aspects to the park and friends organization. The Warner Parks contains Oak/Hickory hardwood forests that are heavily infested with the invasives listed on the next page. Utilizing integrated pest management, IPC has controlled many acres of these parks. The primary control has been either mechanical removal or cutting and treating the multi stemmed species throughout the park.

The photo above is before cutting and treating. The photo below shows the results after a few hours of cutting and treating bush honeysuckle

Invasive Pest Plants Controlled at the Warner Parks in Nashville, TN

<i>Scientific Name</i>	Common name	Cut and Treat	Girdle	Foliar Spray	Grub	Basal Bark
Tree Species						
<i>Ailanthus altissima</i>	Tree of Heaven	X	X	X	X	X
